

Student Satisfaction Survey (SSS)

Student Satisfaction Survey (SSS) has been conducted to evaluate the institutional performance. It consists of 20 parameters regarding the overall facilities of the college. The feedback form provided a grade scale (poor, average, good, and excellent) to the students to evaluate the parameters. For an impartial analysis on feedback, the data was collected from the twenty different departments of the college from the different semesters including science, arts and commerce stream. Basic statistical tools are used to analyse each criterion and are presented in charts.

The average performance of the faculties was found ranging from poor to excellent in terms of the score received from the students in all the 21 parameters. But, in a few cases it was noticed the average grade or lower. In this regard, suggestions, counselling and support have been provided to concerned department for enhancement of quality education.
